**Subject:** Microsoft settlement

The legal INDUSTRY is out of control. Their greed and never ending pursuit for prolonging the billing for outrageous hourly and contingency fees is unconscionable. Now they are again on the quest to extort and redistribute cash into their already bloated bank accounts. The sick thing with that sleazy mob is that they are now stealing from the American children who would benefit from this settlement. I know that you're all in the same fraternity and will just consider this a crank e-mail, but then again, you might have decency to agree that your industry has crossed over the line.
